

# Setting Up Your Dispenser Is Easy

PLEASE  
DO NOT  
PLUG IN  
UNTIL STEP 3!

No matter which dispenser you have, we make it refreshingly simple to help you set it up and stay hydrated.

If you've got a water dispenser with the bottle on top, follow these steps:

1. **MAKE SURE THE HOT SWITCH IS IN THE OFF POSITION.**  
It's the red switch in the rear of the dispenser. You can't miss it.

2. **WIPE DOWN BOTTLE AND PLACE IT ONTO THE DISPENSER.**

3. **PLUG THE DISPENSER INTO AN OUTLET.**

4. **ENGAGE THE SPIGOT UNTIL WATER FLOWS SMOOTHLY.**

5. **TURN THE HOT SWITCH BACK TO THE ON POSITION.**

If you have a Lumina™ dispenser, scan the QR code to view our how-to video or find detailed instructions inside.

If you have a Midea dispenser, you'll find detailed instructions inside.

## WARNING:

Filling the hot tank before energizing is important to avoid the insulation from heating or melting, which may cause smoke or give off an odor.
